EXECUTIVE SUMMARY

Channel marketing and business strategy leader with 25+ years of experience across sales, marketing, analytics, consulting, and digital transformation in the technology channel. Proven track record of building revenue-generating programs, leading cross-functional teams, translating data into strategy, and launching new capabilities across distributors, vendors, resellers, and internal stakeholders. Combines enterprise scale, entrepreneurial thinking, and deep institutional knowledge to drive growth and operational improvement.

PROFESSIONAL EXPERIENCE

TD SYNnex / SYNnex CORPORATION

Senior Project Manager | December 2024 - Present

Marketing Manager | June 2010 - December 2024

- **Leading the development of a comprehensive AI-driven marketing management platform** (blueprint) covering planning, execution, and claims, **projected to drive 38,575 hours of efficiency and \$1.3M in savings.**
- **Identified and developed 30+ generative AI use cases** for marketing in the technology's early mainstream phase, helping shape early NexChat direction.
- **Conceived and launched experiential platforms** including World of Inspiration and a VR 3D/2D showroom for HPI/HPE, **generating \$2M+ in program revenue.**
- Built and led a digital marketing practice that generated **\$2M+ in first-year revenue** and contributed **\$6M in digital growth by 2020.**
- Led **ten marketing specialists and analytics resources** supporting areas representing both vendors and programs including PROAV (VISUALSolv), Software (CLOUDSolv), Secure Networking (CONVERGESolv), Retail POS (STORESolv), and Services (SERVICESolv) and Lifecycle Management (RENEWSolv).
- **Partnered with the Marketing SVP and CEO** to deliver a **FIRST Robotics** team-building event for **80+ executives at QEM**, driving awareness, local school sponsorships and a first-ever **STEM for Girls** event with over 200+ girls in attendance in Mauldin, SC.
- **Worked directly with the SVP of Marketing** to craft keynote strategy, messaging, and presentation content for **Vendor Summit** and **Inspire**, which shaped **annual priorities for vendors and partners.**
- **Authored the first Vendor Guide to U.S. Marketing**, which became an annual flagship planning resource for eight years.
- Built and scaled revenue-generating sales-hybrid programs, including **RENEWSolv growth from \$15K to \$350K.**

SYNNEX CORPORATION

Senior Marketing Specialist | May 2007 - June 2010

- Co-developed a landmark **\$1.2M PRINTSolv plan** for HP, including solution architects, dedicated sales support, and custom reseller enablement packages.
- Initiated the **company's first content management system**, moving the business from basic HTML/JavaScript to a scalable CMS framework.
- Negotiated our transition from **D&B to Equifax**, generating **\$600K+ in savings**.
 - **Partnered with the SVP of Sales** to create and implement Beyond Distribution, **strengthening sales team and customer understanding of company-wide value**.

DECISIVELOGIC / MARKETMATTERS LLC

Founder / Marketing Consultant | January 2006 - May 2007

- Crafted a reseller enablement program for our client ScanSource and also built a Cisco competitive marketing plan that generated **\$100K+ in marketing revenue**.
- Led comprehensive brand strategy for local reseller clients **PrimeLine Communications** and **Priority One Security**, with both brands still in use.
- Developed an early **Marketing-as-a-Service** consulting model for small businesses using weekly and monthly retainer support.

SYNNEX CORPORATION

Marketing Specialist | March 2003 - January 2006

- Became the first Marketing Specialist to **generate \$1M in quarterly marketing funding** across HP Hardcopy, Supplies, and Services.
- **Created a data-driven communication** model and predecessor to **PACE**.
- **Launched the first Follow the Supplies** initiative, resulting in **hundreds of thousands of dollars in refreshed printer sales**.

SYNNEX INFORMATION TECHNOLOGIES, INC.

Strategic Sales Representative | December 2000 - March 2003

- **Managed major strategic accounts** including **Siemens Medical Solutions, GBS, and CDS Office Technologies**.
- **Closed a landmark \$2.1M Panasonic deal** with CDS Office Technologies at over **4% profit margin**.

EDUCATION

Bachelor of Science in Marketing Management

Lander University, Greenwood, SC | 1999

Interview Notes

- I have spent 25+ years across sales, marketing, analytics, consulting, and digital transformation at SYNEX and TD SYNEX.
- I have consistently helped turn strategy into programs that drive revenue, efficiency, and business value.
- I am applying because this role feels like a natural fit for the work I have already been doing and the level at which I want to contribute.
- I bring deep company knowledge, practical execution, strategic thinking, and a real desire to help TD SYNEX grow.

Why I applied

- This role feels like a natural fit for the work I have already been doing throughout my career at SYNEX and TD SYNEX.
- I have spent 25+ years across sales, marketing, analytics, consulting, and digital transformation.
- I have consistently helped turn strategy into real programs that drive revenue, efficiency, and business value.
- I care deeply about TD SYNEX, I am proud of the career I have built here, and I want to serve the company in a bigger capacity.
- I am not applying because I am unhappy. I am applying because I see an opportunity to contribute at a higher level.

Why I am a strong fit

- I bring deep company knowledge and understand how this business works across sales, marketing, vendors, resellers, and internal teams.
- I know how to connect strategy to execution.
- I have a proven track record of building revenue-generating programs and cross-functional initiatives.
- I have worked as both a people leader and an individual contributor, so I understand both strategy and execution realities.
- I am comfortable in ambiguity, and I am often at my best when helping shape new ideas, frameworks, and growth opportunities.

My core strengths

Strategic thinking

- I naturally think in terms of business models, growth opportunities, and how to organize programs for scale.
- I do not stop at ideas. I think about how they connect to real business value.

Turning ideas into programs

- A repeated theme in my career has been seeing a gap, shaping the idea, building support, and helping turn it into something real.

Cross-functional influence

- I have worked across marketing, sales, analytics, leadership, vendors, and partners.
- I know how to get different groups aligned around a shared outcome.

Company and channel knowledge

- I understand the channel, the business model, the internal culture, and how vendors and partners think.
- That lets me move faster and make better judgment calls.

Strong proof points to bring up

AI-driven blueprint / current work

- Currently leading development of an AI-driven marketing management platform covering planning, execution, and claims.
- Projected impact is 38,575 hours of efficiency and \$1.3M in savings.
- Good example of strategy, innovation, process thinking, and practical business value.

Digital marketing growth

- Built and led a digital marketing practice that generated \$2M+ in first-year revenue.
- Contributed to \$6M in digital growth by 2020.
- Good example of building something new and scaling it.

Experiential and immersive platforms

- Conceived and launched World of Inspiration and a VR 3D/2D showroom for HPI/HPE.
- Generated \$2M+ in program revenue.

- Good example of innovation tied to revenue, not just creativity.

RENEWSolv

- Helped grow RENEWSolv from \$15K to \$350K.
- Good example of taking an underdeveloped program and turning it into something meaningful.

PRINTSolv

- Co-developed a \$1.2M PRINTSolv plan for HP.
- Good example of strategic planning, sales enablement, and cross-functional packaging.

CMS transition

- Initiated the company's first CMS, moving from basic HTML/JavaScript to a scalable framework.
- Good example of seeing around corners and helping the company modernize.

D&B to Equifax

- Negotiated the transition, generating \$600K+ in savings.
- Good example of judgment, business impact, and practical decision-making.

FIRST Robotics / STEM

- Partnered with the Marketing SVP and CEO to deliver a FIRST Robotics event for 80+ executives.
- That led to sponsorships and a STEM for Girls event with 200+ girls attending.
- Good example of leadership, executive exposure, community impact, and program creation.

My story in simple terms

- I started in sales.
- I moved into marketing and quickly grew into strategy and program development.
- I stepped out and built consulting businesses, which sharpened my entrepreneurial thinking.
- I came back and helped build programs, guide strategy, and support growth across the business.
- Over time, I have consistently operated at the intersection of strategy, execution, innovation, and business planning.

Why now

- This role matches the type of work I am already doing and the level at which I want to contribute.
- I feel ready for it because I have built the pattern over time.
- I want a seat at the table where strategy, priorities, and execution come together.
- I want to help TD SYNEX grow and evolve, especially as AI, automation, and new business models continue to reshape the market.

How to answer “Why should we choose you?”

- I bring a rare combination of deep company knowledge, channel experience, strategic thinking, and practical execution.
- I understand the business from multiple angles: sales, marketing, consulting, operations, and innovation.
- I have a track record of building programs that drive measurable value.
- I care deeply about the company and want to contribute in a bigger way.

Likely weakness / risk question

If asked about your weakness

Good honest angle:

- In the past, I have sometimes tried to own conceptualization, execution, and implementation too personally.
- What I have learned is that the best outcomes come when the strategy is clear, the roles are clear, and the right execution support is in place.
- I still think strategically first, but I have become much more aware of how important follow-through, resourcing, and operating rhythm are.

That is a much better answer than sounding defensive.

If asked about management style / fit

- I work best in environments built on trust, mutual respect, and honest exchange of ideas.
- I value leaders who allow room for challenge, push back, and growth.
- I bring strong ideas, but I also respond well to leaders who sharpen those ideas and help turn them into action.
- I am at my best where strategy and execution are both valued.

Questions you may want to ask Jessica

- How do you define success in this role in the first 6 to 12 months?
- Where do you see the biggest gaps or opportunities this person needs to address first?
- How much of this role is strategic planning versus execution versus cross-functional coordination?
- What resources or support does this role have to help drive follow-through across priorities?
- What does strong partnership with you look like in this role?
- Are there specific traits or working styles that tend to do well on your team?

Watch-outs for the interview

- Do not ramble through your whole history.
- Lead with the business value, not just the story.
- Do not overuse internal acronyms unless Jessica will know them.
- Stay confident, but not entitled.
- Make it clear you want to contribute, not just get a title.
- Keep tying back to growth, efficiency, cross-functional leadership, and strategy.

Closing statement

- I believe this role is a strong match for how I think, how I work, and the value I know I can bring.
- I care deeply about this company and would welcome the opportunity to contribute in a bigger capacity.
- I believe my background gives me the perspective to step in and add value quickly.

CAREER HIGHLIGHTS

Marketing Strategy and Business Planning

- Built strategic plans, vendor guides, and reseller programs across SMB and enterprise environments.
- Built an **end-to-end marketing blueprint** from planning through claims and helped shape an AI-driven automation model projected to save **38,575 hours** and **\$1.3M**.

Revenue Growth and Analytics

- Drove **300% digital growth in year one of our newly established Digital Marketing Team**, generating **\$2M+ first-year revenue** and contributing to **\$6M by 2020**.
- Grew **RENEWSolv** from **\$15K to \$350K** in the one year I managed this tool.

Technical and Digital Platform Acumen

- Helped implement the company's first **CMS**, moving from static HTML to a scalable content platform.
- **Led** solution planning, development, and training across **AI automation, digital platforms, analytics, and VR/3D showroom initiatives**.

Leadership and Cross-Functional Influence

- **Led a team of 10 marketing specialists and analytics resources** supporting major solution areas that **generated over 50% of total marketing revenue**.
- **Built alignment** across marketing, sales, vendors, analytics, and leadership to drive adoption and execution with programs such as Beyond Distribution.

Executive Communication and Stakeholder Engagement

- Developed annual strategic initiatives, guiding principles, and executive messaging for marketing and senior leadership, including flagship events such as Inspire and Vendor Summit.
- Regularly translated complex ideas into clear business actions for executives, vendors, and partner audiences.

Innovation and Continuous Improvement

- Launched experiential platforms generating **\$2M+ in revenue and inspired our Atlas Platform**.
- Built **first-generation programs** around data-driven planning, autonomous reseller enablement, and AI-led operating models.

Adaptability and Global Collaboration

- Proven ability to lead through rapid change, business transformation, and emerging technology in fast-moving environments.
- Effective across functions, regions, and time zones. Current and ongoing projects and collaboration with China, LATAM, and Europe.

1. You have a strong background in strategy and program creation. Tell me about a time you owned a business plan end to end and had to be accountable for the revenue outcome, not just the idea.

DemandSolv

What I'm testing:

- whether you can move beyond concepting
- whether you can talk in terms of ownership, targets, performance, and outcomes
- whether you understand commercial accountability

What your answer needs:

- business goal
- your role
- what you forecasted
- what happened
- what you learned

Answer: One of my biggest successes was DEMANDSolv, at the time it was Microsoft Only, and I had worked directly with ContentMX to conceptualize a partner and vendor monetization model. We sold about \$500 in our first year and scaled to \$2M.

- We opened

2. This role is heavily tied to Digital Customer Success and customer lifetime value. Where have you specifically improved adoption, retention, upsell, or lifecycle value rather than just top-of-funnel marketing?

DemandSolv, RenewSolv - Expansion

What I'm testing:

- whether you can translate your background into lifecycle thinking
- whether you understand post-sale value, not just campaign creation
- whether you can connect partner/customer engagement to revenue expansion

Your risk:

- talking only about marketing programs and not enough about customer success mechanics
-

3. If I gave you responsibility for North America marketing and digital customer success planning, how would you decide where to place bets in Q1?

True ROI in one of 3 ways - final impact of cost savings, increase our overall top line revenue, or increase our overall profitability.

Then, can we garner the right support internally and/or externally.

What I'm testing:

- prioritization
- strategic discipline
- how you think under ambiguity
- whether you lead with data or intuition

What I want to hear:

- segmentation
 - revenue potential
 - adoption friction
 - partner lifecycle gaps
 - operational feasibility
 - ROI logic
-

4. Tell me about a time the data told you one thing, but the business reality forced you to make a harder decision.

What I'm testing:

- business judgment
- whether you know the limits of dashboards
- whether you can balance analytics with real-world complexity

5. This role requires cross-functional alignment across Sales, Digital, Operations, Product, and Finance. Tell me about a time one of those groups pushed back hard on your plan. What did you do?

What I'm testing:

- influence without authority
- maturity under friction
- ability to adjust without folding

Bad answer:

- "I got everyone aligned"

Good answer:

- shows tension, tradeoffs, compromise, and outcome
-

6. You've built new things before. How do I know you can also optimize, govern, and scale what already exists?

What I'm testing:

- whether you're just an ideation person
- whether you can operate in the less glamorous discipline of refinement and follow-through

This is a key one for you.

From your CMO

This is a tougher lens. Less interested in your history. More interested in whether you can think at the level the role needs.

1. Why are you the right person for this role now, and why should I choose you over someone with a more traditional digital customer success background?

What I'm testing:

- self-awareness
- competitive positioning
- whether you understand your own gaps and strengths

You need to answer this directly, not with a career history.

2. Walk me through how you would connect revenue targets, engagement metrics, and customer lifetime value into one operating plan.

What I'm testing:

- whether you think in systems
- whether you understand connected metrics
- whether you can bridge executive language and execution language

I want to hear something like:

- segment
 - target behavior
 - engagement motion
 - revenue hypothesis
 - success metrics
 - optimization cadence
-

3. Give me an example of a program you would stop, reduce, or redirect if the data showed it was underperforming. How would you make that call?

What I'm testing:

- decisiveness
 - financial discipline
 - willingness to challenge legacy motions
 - whether you can cut as well as build
-

4. This role mentions APIs, web technologies, and digital platforms. What is your actual level of technical fluency, and where are you relying on others?

What I'm testing:

- honesty
- technical credibility
- whether you overstate technical depth

Best posture:

- confident business-technical fluency
 - clear on where you lead requirements, workflows, and use cases
 - honest that you are not pretending to be an engineer
-

5. If I looked at your first 90 days in this role, what would be visibly better by the end of that period?

What I'm testing:

- whether you can enter a role with focus
- whether you know how to create momentum
- whether you can turn broad responsibilities into practical first moves

Strong answer likely includes:

- listening tour
 - baseline metrics
 - segmentation view
 - performance dashboard
 - quick wins
 - one or two strategic priorities
-

6. You've had success in strategy, innovation, and program design. Where have you failed in execution, and what have you changed because of it?

What I'm testing:

- humility
- growth
- whether you know your own tendency to over-own concepting and not enough execution structure

This is another big one for you. You should have a crisp, mature answer ready.

7. Tell me how you would forecast program performance for a new initiative when historical data is thin or messy.

What I'm testing:

- analytical maturity
- forecasting logic
- comfort with imperfect information

I'd want to hear:

- assumptions
 - benchmark proxies
 - scenario ranges
 - leading indicators
 - review cadence
-

8. What does inclusivity look like in program strategy, not just in team culture?

What I'm testing:

- whether you can move beyond generic values language
 - whether you think about audience design, access, representation, adoption barriers, and varied partner/customer realities
-

The 5 questions you should practice hardest

If I had to bet on the most important ones, I'd drill these first:

1. **Why are you the right person for this role now?**
 2. **Where have you specifically driven adoption, retention, upsell, or lifecycle value?**
 3. **How would you connect revenue targets, engagement metrics, and customer lifetime value into one operating plan?**
 4. **Tell me about a time a cross-functional partner pushed back hard on your plan.**
 5. **Where have you failed in execution, and what have you changed?**
-

Where I think you are most vulnerable

These are the places I'd push if I were interviewing you hard:

1. Customer Success depth

Your background is strong, but you need to translate it clearly into:

- adoption
- retention
- upsell
- lifecycle engagement
- monetization after the initial motion

2. Execution discipline

You already know this one.

You must show that you understand the difference between:

- strategy creation
- operational follow-through
- owning a cadence, dashboard, and accountability structure

3. Technical fluency without overclaiming

You sound strong here, but do not drift into vague "I can learn anything" language. Be concrete.

4. Data-to-decision logic

You have examples, but be ready to explain:

- what data you looked at
- how you interpreted it
- what decision changed because of it

The tone you should use in the interview

- confident, not grandiose
- direct, not rambling
- strategic, but grounded

- honest about where you've grown
- specific when talking about numbers and outcomes
